

CLAIM AMENDMENTS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently amended) A method comprising:

a payment card processor providing a notification message to a payment card holder of an attempted transaction using a payment card when the attempted transaction satisfies a threshold-based rule and the attempted transaction is processed without providing the notification message when the attempted transaction does not satisfy the threshold-based rule, wherein the threshold-based rule is used to determine whether the attempted transaction exceeds a payment amount limit set on a single attempted transaction;

wherein the notification message includes a plurality of options for the payment card holder to decline authorization of the attempted transaction.

2. (Previously presented) The method of claim 1, wherein the plurality of options comprise a first option for the payment card holder to decline authorization of an undesirable but non-fraudulent transaction, and a second option for the payment card holder to decline authorization of a fraudulent transaction.

3. (Previously presented) The method of claim 2, further comprising:

receiving a selection made by the payment card holder of the first option; and
based on the selection, providing a message to a merchant involved in the attempted transaction to decline the attempted transaction and to return the payment card to an individual attempting the transaction.

4. (Previously Presented) The method of claim 2, further comprising:

receiving a selection made by the payment card holder of the second option; and
based on the selection, providing a message to a merchant involved in the attempted transaction to decline the attempted transaction and to withhold the payment card from an individual attempting the transaction.

5. (Previously Presented) The method of claim 2, further comprising:
receiving a selection made by the payment card holder of the second option; and
based on the selection, locking an account associated with the payment card.
6. (Previously Presented) The method of claim 2, further comprising:
receiving a selection made by the payment card holder of the second option; and
based on the selection, automatically reporting the fraudulent transaction to a law
enforcement authority.
7. (Previously Presented) The method of claim 2, further comprising:
receiving a selection made by the payment card holder of the second option; and
based on the selection, automatically reporting the fraudulent transaction to a credit
reporting agency.
8. (Previously presented) The method of claim 1, further comprising:
receiving a selection made by the payment card holder of one of the plurality of options
to decline the attempted transaction; and
sending a reason code to a merchant involved in the attempted transaction to indicate why
the attempted transaction has been declined.
9. (Previously Presented) The method of claim 1, further comprising:
providing an option for the payment card holder to authorize the transaction.
10. (Previously Presented) The method of claim 1, wherein the notification message
indicates a transaction amount, a merchant name, and at least part of a number of the payment
card.

11. (Currently amended) A system comprising:

a payment card transaction notification and authorization system configured to provide a notification message from a payment card processor to a payment card holder of an attempted transaction using a payment card when a threshold-based rule is satisfied, to provide a first option for the payment card holder to decline authorization of the attempted transaction upon receiving the notification message, to provide a second option for the payment card holder to decline authorization of the attempted transaction upon receiving the notification message, and to decline authorization of the attempted transaction in response to receiving information indicating an input selecting the first option or the second option by the payment card holder, the system being configured to allow the attempted transaction to be processed without providing the notification message when the transaction does not satisfy the threshold-based rule, wherein the threshold-based rule is used to determine whether the attempted transaction exceeds a payment amount limit set on a single attempted transaction.

12. (Previously presented) The system of claim 11, wherein the first option relates to declining authorization of an undesirable but non-fraudulent transaction, and the second option relates to declining authorization of a fraudulent transaction.

13. (Previously presented) The system of claim 12, wherein the payment card transaction notification and authorization system is further configured to provide a message to a merchant involved in the attempted transaction to decline the attempted transaction and to return the payment card to an individual attempting the transaction in response to receiving information indicating an input selecting the first option by the payment card holder.

14. (Previously presented) The system of claim 12, wherein the payment card transaction notification and authorization system is further configured to provide a message to a merchant involved in the attempted transaction to decline the attempted transaction and to withhold the payment card from an individual attempting the transaction in response to receiving information indicating an input selecting the second option by the payment card holder.

15. (Previously presented) The system of claim 12, wherein the payment card transaction notification and authorization system is further configured to lock an account associated with the payment card in response to receiving information indicating an input selecting the second option by the payment card holder.

16. (Previously presented) The system of claim 12, wherein the payment card transaction notification and authorization system is further configured to automatically report the fraudulent transaction to a law enforcement authority in response to receiving information indicating an input selecting the second option by the payment card holder.

17. (Previously presented) The system of claim 12, wherein the payment card transaction notification and authorization system is further configured to automatically report the fraudulent transaction to a credit reporting agency in response to receiving information indicating an input selecting the second option by the payment card holder.

18. (Previously presented) The system of claim 11, wherein the payment card transaction notification and authorization system is further configured to send a reason code to a merchant involved in the attempted transaction to indicate why the attempted transaction has been declined in response to receiving information indicating the input to select the first option or the second option by the payment card holder.

19. (Previously presented) The system of claim 11, wherein the payment card transaction notification and authorization system is further configured to provide an option for the payment card holder to authorize the transaction.

20. (Previously Presented) The system of claim 11, wherein the notification message indicates a transaction amount, a merchant name, and at least part of a number of the payment card.

21. (Previously presented) The system of claim 11, wherein the payment card transaction notification and authorization system is further configured to increase a purchase limit threshold for the payment card based on a short message service (SMS) message received from the payment card holder.

22. (Currently amended) A method comprising:

providing a notification message from a payment card processor to a payment card holder

of an attempted transaction using a payment card when the attempted transaction satisfies a threshold-based rule and the attempted transaction is processed without

providing the notification message when the attempted transaction does not

satisfy the threshold-based rule, the notification message indicating a transaction amount, a merchant name, and at least part of a number of the payment card,

wherein the threshold-based rule is used to determine whether the attempted

transaction exceeds a payment amount limit set on a single attempted transaction;

providing an option for the payment card holder to authorize the transaction;

providing multiple options for the payment card holder to decline authorization of the

attempted transaction, the multiple options comprising a first option for the

payment card holder to decline authorization of an undesirable but non-fraudulent

transaction, and a second option for the payment card holder to decline

authorization of a fraudulent transaction;

receiving a selection of one of the options made by the payment card holder;

if the selection is of the first option, providing a message to a merchant involved in the

attempted transaction to decline the attempted transaction and to return the

payment card to an individual attempting the transaction; and

if the selection is of the second option, locking an account associated with the payment

card and providing a message to the merchant involved in the attempted

transaction to decline the attempted transaction and to withhold the payment card

from the individual attempting the transaction.

23. (Canceled).

24. (Previously presented) The method of claim 1, wherein the threshold-based rule is used to determine whether the attempted transaction is at a payment card holder approved type of merchant.

25. (Previously presented) The method of claim 1, wherein the threshold-based rule is used to determine whether the attempted transaction exceeds a payment card holder usage threshold.

26. (Previously presented) The method of claim 1, wherein the threshold-based rule is used to determine whether the attempted transaction occurs during a payment card holder time window threshold.

27. (Previously presented) The method of claim 1, wherein the threshold-based rule is used to determine whether the attempted transaction exceeds a payment card holder credit limit threshold.

28. (Canceled).

29. (Previously presented) The system of claim 11, wherein the threshold-based rule is used to determine whether the attempted transaction is at a payment card holder approved type of merchant.

30. (Previously presented) The system of claim 11, wherein the threshold-based rule is used to determine whether the attempted transaction exceeds a payment card holder usage threshold.

31. (Previously presented) The system of claim 11, wherein the threshold-based rule is used to determine whether the attempted transaction occurs during a payment card holder time window threshold.

32. (Previously presented) The system of claim 11, wherein the threshold-based rule is used to determine whether the attempted transaction exceeds a payment card holder credit limit threshold.
